I oppose bill number HR4026. The service it wants to eliminate is very helpful in our business. Local stations can not get out far enough for it to be helpful. We are truck drivers and when we load we listen to the traffic and forecast thru the major cities we are traveling thru in order to plan out route. The other day it told us that there was a big back up at the two bridges we had a chose to cross (we where in canada), we new which one we were to cross that had the least waiting time. This all way before we had to choose because xw radio goes out farther than local. Thank you for reading my comment. Randy
